Figma to HTML Responsive Landing Page

A modern, responsive landing page built by converting a Figma design into a fully functional website using HTML, CSS, and JavaScript. The project focuses on pixel-perfect implementation, responsive design, and clean frontend development practices.

🌐 Live Demo

- **Live Website:** *Add your GitHub Pages URL*
- **Repository:** *Add your GitHub repository URL*

📖 Project Overview

This project recreates a business landing page from a Figma design with a strong focus on visual accuracy and responsiveness. Every section has been carefully implemented to closely match the original design while maintaining clean, well-structured code and a smooth user experience across different screen sizes.

✨ Features

- Pixel-perfect implementation from the Figma design
- Fully responsive layout for desktop, tablet, and mobile devices
- Responsive navigation with a mobile drawer menu
- Hero section with clear call-to-action buttons
- Business compliance information section
- Interactive mobile navigation using JavaScript
- Semantic HTML5 structure
- Clean, organized, and maintainable CSS
- Optimized image assets and consistent spacing

🛠️ Tech Stack

- HTML5
- CSS3
- JavaScript (ES6)
- Flexbox
- CSS Grid
- Figma (Design Reference)

📂 Project Structure

```
.
├── index.html
├── style.css
├── images/
├── README.md
└── .gitignore
```

🚀 Getting Started

1. Clone this repository.
2. Open the project folder.
3. Open `index.html` in your browser.

For development, you can also use the **Live Server** extension in Visual Studio Code.

📱 Responsive Design

The layout adapts seamlessly across desktop, tablet, and mobile devices using responsive breakpoints and flexible layouts. Interactive navigation ensures an improved user experience on smaller screens.

🎯 Skills Demonstrated

- Converting Figma designs into responsive webpages
- Responsive Web Design
- Semantic HTML5
- Modern CSS with Flexbox and Grid
- Mobile-first UI implementation
- JavaScript DOM manipulation
- Clean project organization

🔮 Future Improvements

- Add smooth scroll animations
- Improve accessibility (ARIA support and keyboard navigation)
- Enhance performance through image optimization
- Add additional sections and interactions
